ASKI SFA

The **NEW VERSION** is **ON**

Increase your field sales rep's capabilities

ASKI SFA (Sales Force Automation) is an advanced mobile system for field sales and POS management. The system allows for planning, monitoring, and managing of sales reps in real-time, with analytic tools that grant the decision makers the ability to quickly respond, do so from any location, and adjust to market demands, by using online information from the field. **ASKI SFA** provides solutions in the sales space - Presales, Direct-Store - Delivery & Van Sales are all covered in one comprehensive application. The system offers solutions to all positions involved in the sales process.

Challenge your passion for sales

ASKI SFA Mobile is a goals oriented sales system. It displays, at any given moment, the actual sales goal for the next customer visit and for the daily plan. These step-by-step goals are the only way to ensure your sales reps will achieve their monthly goals. ASKI also provides a real-time ranking module to motivate the sales reps while ranking their achievements against other sales reps within the organization. ASKI SFA Mobile brings all the essential organizational information to the hands of the sales reps, using advanced tools and technologies, while interacting with the customer in the field.

The system supports every sales function: sales reps, field sales managers, and supervisors.

Get ahead of the curve, spot and seize opportunities

ASKI SFA Management Console allows for planning, management, and monitoring of field operations using tools for Point Of Sale management, product categories administration, goal planning, market segmentation, promotional measures administration, and more. The system enables processes and market trends identification by displaying all the data in the executive table. The system provides advanced tools for creation, distribution, collection and analysis of questionnaires, shelf surveys, quality measurements, customer surveys and more.

Leveraging sales managment

- Improvements in sales force performance by daily personal analysis based on the sales metrics
- Daily monitoring of goal run rates per customer visit to ensure moving towards achievement of monthly goals
- Increase your sales team competitiveness and motivation by displaying comparative analysis and ranking
- Setting up promotional product groups, mandatory products and the ability to control the ordering workflow will maximize the sales rep ability to affectively offer your product portfolio
- Analysis of the sales process and updated sales data at any given moment
- Business information collection and analysis in real-time from the moment the customer survey, shelf survey, or check list are created
